Celestina is a clever antagonist in a book originally published in 1499 by the Author Fernando de Rojas.

The name Celestina is actually a synecdoche referring to the character’s occupation in life.

Although considered a comedy, by our standards today, La Celestina would be a melodramatic retaliatory hoot!

In the movie, Celestina teams up with Sempronio and Parmeno, who eventually murder her for lying to them.

La Celestina takes place in Spain, a country known for delicious tapas and the famous Spanish Inquisition.

If Celestina were alive today, she would recommend coming out to watch this movie put on by the FLTC...
